

5th Grade Newsletter

February 25th, 2019

Mr. Cawson and Mrs. Pell

WHAT WE ARE LEARNING

- * Math – Division with whole numbers and decimals. Next, we will study measurement and geometry.
- * Reading – Students are learning to build on their reading comprehension through inferring, questioning, predicting and visualizing.
- * Writing – Students are learning to write research into an informational paper.
- * Science – Students are demonstrating their knowledge of seasons, moon phases and tides.
- * Social Studies – Students are demonstrating their knowledge on North America, West Africa and Europe prior to colonization.

HOMEWORK

The next two weeks we will have... *5-9 through 8-4 Math Homework. Please notice that we jumped ahead to unit 8 in preparation for MSTEP testing which is quickly approaching. This unit is comprehensive and lengthy and is best suited to be completed now, rather than at the end of the year.

Students can turn their homework in as they complete it, or can turn it all in together. As always, all students should be reading 20 to 30 minutes a night.

NOTES FROM THE TEACHER

Conference signups have been sent home. Please be sure to sign up for a time slot that works best for you! Thank you again for a very successful pizza fundraiser!
